MODERN WATER LAUNCHES NEW CHINESE WEBSITE

Modern Water plc (LSE: MWG), the owner of leading water technologies for the production of fresh water and monitoring of water quality, continues to demonstrate its commitment to China with the launch of a new Chinese website.

The new website www.modernwater.cn comes just weeks after Modern Water signed a framework agreement with Hangzhou Development Center of Water Treatment Technology, Company Limited which will allow both organisations to jointly identify and develop projects in China, including seawater desalination plants and other water-related opportunities.

Simon Humphrey, Chief Executive Officer of Modern Water, commented: "As part of our ongoing drive to extend Modern Water's presence in China we have launched a dedicated website that will underpin our business development pursuits in the region."

Notes to editors

Modern Water

Modern Water owns, installs and operates world-leading membrane technology and develops and supplies advanced systems for water monitoring. Its shares trade on the Alternative Investment Market of the London Stock Exchange.

Modern Water's patented Forward Osmosis (FO) technology has been proven to significantly reduce costs, lower energy consumption and lessen environmental impact in a variety of industries. With a sales presence in over 60 countries, the Group's Monitoring Division includes the world's only real-time continuous toxicity monitor and trace metal analysers for monitoring the quality of drinking water.
