Modern Water plc
("Modern Water" or "the Group")

MODERN WATER TARGETS LATIN AMERICAN MARKET

Modern Water plc (AIM:MWG), the owner of leading water technologies for the production of fresh water and monitoring of water quality, has today launched a Spanish language version of its website (www.modernwater.com/es) for its customers across Latin America and Spain.

Modern Water's Monitoring Division has a long-standing presence in Latin America where it has been selling its monitoring products, including the industry-leading M500 toxicity monitor, for over ten years. In order to continue to expand in the region it has created a Spanish language site. The site aims to provide clear information about Modern Water's monitoring products and membrane processes, as well as further promote the Group's identity in the region.

Simon Humphrey, Modern Water CEO, commented: "Modern Water has worked hard to establish itself as a key player in the monitoring industry in South America. With the introduction of our Spanish language website we will be able to reach out to a wider audience who could benefit from our water quality monitoring products and membrane process technologies."

Notes to editors
Modern Water owns, installs and operates world-leading membrane technology and develops and supplies advanced systems for water monitoring. Its shares trade on the Alternative Investment Market of the London Stock Exchange.

Modern Water's patented forward osmosis (FO) technology's benefits include lower energy consumption and lessen environmental impact in a variety of industries. With a sales presence in almost 60 countries, the Group's Monitoring Division includes a leading real-time continuous toxicity monitor and trace metal analysers for monitoring the quality of drinking water.
