Modern Water plc
("Modern Water" or "the Group")

Modern Water appoints new President for its Monitoring Division

Modern Water plc (AIM:MWG), the owner of leading technologies for water and wastewater treatment and the monitoring of water quality, announces that its Monitoring Division has appointed Doug Workman as its global President, effective as of 14 March 2016.

Doug brings over twenty-five years' experience to the position and has held key customer-facing leadership positions at prominent filtration and water treatment companies, such as Clarcor, Amafiltegroup BV, Memtec Limited and USF Filtration and Separations Group, centered on strategic growth and innovation.

Simon Humphrey, Modern Water's CEO, commented: "We are delighted to welcome Doug to Modern Water. He brings extensive experience with a successful track record in sales, marketing and operational excellence and a proven ability to drive profitable growth."

Notes to Editors:

About Modern Water

Modern Water owns, installs and operates world-leading membrane technology and develops and supplies advanced systems for water monitoring. Its shares trade on the Alternative Investment Market of the London Stock Exchange.

Modern Water has developed and commercialised world-leading patented Forward Osmosis desalination technology which can be used in a variety of industries. Its benefits include lower energy consumption, improved water quality and lower environmental impact. With a sales presence in almost 60 countries, the Group's Monitoring Division includes a leading real-time continuous toxicity monitor and trace metal analysers for monitoring the quality of drinking water.
